Easier and More Effective Planning

Whether you're a supplier of *fresh products baked to order* or need to *make to forecast and despatch from stock*, the challenge every week is to schedule production to cover all expected/forecast customer orders, while at the same time not creating too much unsaleable stock.

Foodlogik has a wide range of standard integrated features that allow you to ditch those ever more complicated spreadsheets.

Stock Availability

Stock ID	Description	Qty On Order	Qty In Stock	Available
101010	Sandwich White 800g	1943	1000	-943
101014	Sandwich White Thick Sliced 800g	233	0	-233
101016	Sandwich White Med Sliced 800g	155	0	-155
101020	Farmhouse White 800g	1084	1200	116
101024	Farmhouse White Thick Sliced 800g	0	0	0
101026	Farmhouse White Med Sliced 800g	0	0	0
101030	Long Tin White 800g	0	0	0
101034	Cottage Loaf White 800g	0	0	0

Stock Availability Report to display all products with the total on order and the available stock, so at a glance you can see what you need to make...

Daily Production Sheet nets off orders and forecast from existing stock and production, generating recipe sheets and ingredient requirements.

Daily Planning enables you to:

- ◇ Calculate the total hours per product so you know how much labour is needed per day per line
- ◇ View actual orders taken, so you know if you are running to plan
- ◇ Check that the daily plan for the week adds up to the weekly forecast so you can see if you will achieve your budget
