

Yet another Merit Customer

Merit Welcomes

The Breadwinner Bakery started as a retail bakery in central Edinburgh and soon gained a reputation for attractive and innovative organic bread, pastries, cakes and their unique Stromboli range.

Now situated in a new, open-plan premises in Gyle, Edinburgh, Breadwinner are expanding their production to meet buoyant demand from shops and wholesalers. Director Kris McVey already had a comprehensive spreadsheet-based system, but felt that this would hold them back as the business grew. He conducted a thorough search of the software market and spoke to existing users — and of all the replacement systems he looked at, SOM offered the most flexibility and widest range of features.

As Kris says, " We had originally planned to run our old system and SOM system side by side for around a month, to make sure the transition ran smoothly. Though within 2 days of running with SOM we had already decommissioned our old system. This was down to the quality and simplicity of the software and the excellent support given by the Merit Team to make the transition. We look forward to discovering how the software's extensive functionality can further support The Breadwinner's growth".
