

Foodlogik Stock Manager

On-Line Control of Ingredient Stores

FoodLogik's simple to use Android **Stock Manager** is yet another productivity tool from Merit Technology. No more need to print a check-list, write in the balances and type it all in again. Just go to the warehouse, scan the barcode label and enter the new balance. **Foodlogik** is instantly up-to-date with all the new balances and batch numbers, enabling stock traceability and stock valuation reports to be printed straight away.

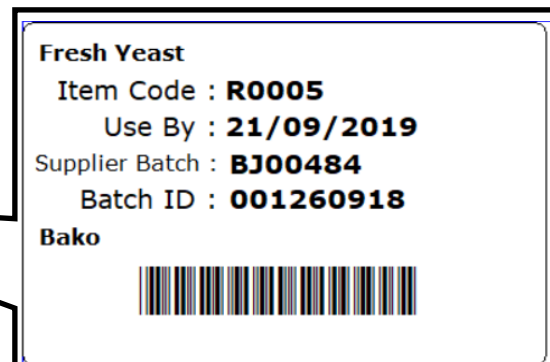

Stock Manager in use scanning a Foodlogik ingredient label with a Seuic AutoID 9 Handheld from MobileWorx

Stock Manager's intuitive screens enable you to gain on-line control of your stocks and traceability. When used in concert with **Foodlogik's Purchasing and Goods Receiving** module, **Stock Manager** provides a fully automated end-to-end stock control system with minimal additional staff training.

Foodlogik automatically prints bar-coded labels at goods-inwards

Based on low-cost Android scanners, **Stock Manager** promises to pay back quickly and vastly improve stock accuracy, leaving you more time to run your business effectively.
