

Foodlogik - Auto Raise Purchase Orders

This program looks at the average ingredient purchase history over a user-defined number of days and suggests an order quantity, covering the minimum stock level and rounding up to a full pack-size. The user can change the quantity and then tell the system to generate a new PO, which can be sent by email to the supplier.

1. Select default supplier and a list of suggested orders is shown

The user can amend the suggested order column and the screen re-calculates the number of packs.

Stock ID	Description	Sugg Order (Units)	Sugg Order (Packs)	Supp ID	Def Pack	Current Level	Avg Usq Per Day	Est Days	Minimum Level
001500	Yeast*Fresh Craftbake Traditional	500	50	0001	10.000	236.290	0.0000	N/A	0.000
